

Sir or Madam

I am an XM Satellite radio subscriber who uses the instant traffic and weather features XM offers. When I travel it is very helpful to be able to get this information immediately when I'm in a new city that I'm not familiar with. This information is almost impossible to find if you're not from the local area. I pay for this service and don't see why I shouldn't be able to have it. Please reject the NAB's petition 04-160 and allow XM to provide the programming that I ask and pay for.

Thank you,

Stephen Cannady
